

***The Power of Clean:* The reality and perception of clean affects healthcare facility reputations and HCAHPS scores**

Employee Retention and Satisfaction

PathO3Gen Solutions UVZone Shoe Disinfection Technology User Survey Results:

- 97% Said UVZone Is Easy to Use
- 90% Felt They Would Not Be Carrying Harmful Germs
- 89% Felt It Created an Attractive Working Environment
- **92% Overall Employee Satisfaction**

"...since the inception of the PathO3Gen Solutions UVZone shoe disinfection technology and other infection control measures, we have reduced our (HAI) rate by 53%." --Debi Martoccio, Vice President and Chief Operating Officer at AdventHealth Connerton

Efficacy

Independent studies prove the UVZone® is on average 110x more effective than UVC light alone, eliminating up to 99.999% of common disease-causing microorganisms including MRSA, C. diff, E. coli, Candida Auris, and Klebsiella Pneumoniae; and leaves zero coronavirus residue on footwear in 8 (eight) seconds.

Ease of Use

- Simple Installation – place the SSS into the custom mat and plug into a standard outlet
- Step onto unit, wait for 8 seconds and step off when you hear the beep
- Supports up to 400 pounds and can be used with any footwear
- Provides 24/7 continuous clean and facility protection
- No additional FTEs required
